MEMORANDUM FOR: Deputy Director for National Foreign Assessment

FROM: Director of Central Intelligence

SUBJECT: Technology Transfer

1. I asked for this paper on controls on exports from the United States thinking that we should know more about how export control is administered to see whether there are sources of information in this apparatus that could supplement what the technology transfer center does and also to see how the intelligence product could best be shaped and used.

2. I would like to see a paper prepared for the COCOM meetings as they emerge. We should be sure to see that new information we have on the value of Western technology to Soviet weapons gets into the process and that the various means of transferring technology, including the availability of products, are fully reflected. I am returning to you [redacted] note.
